NBC Learn's online video library gives students access to more than 90 years of inspiring stories and world events as documented by NBC News.

SHORT, RELEVANT, AND INSPIRING

Engage students with short 2-to-5 minute videos that can be effortlessly incorporated into lessons and online assignments.

MADE FOR TEACHING & LEARNING

Watch award-winning original video series like "Science of NFL Football" and "Finishing the Dream: Learning from the Civil Rights Era."

UPDATED DAILY

Videos are added every weekday to a library of over 22,000 resources filled with the latest current events and investigative stories from around the world.

ACCURATE AND TRUSTWORTHY

Each resource is carefully selected to meet the highest NBC News Standards and Practices.

PRIMARY SOURCES

Historic moments, speeches, and events as recorded by NBC News cameras bring history to life for students.

COMPATIBLE WITH ALL DEVICES

NBC Learn resources can be viewed on any device and downloaded for offline use.

CUSTOMIZED IMPLEMENTATION

Design the implementation that's right for you. We have many solutions like individual accounts, IP and domain referral authentication, single sign on, and LMS setup.

LMS INTEGRATIONS

Seamless LMS integrations allow teachers to embed videos into course content for students.

Engage, Explain, Apply

Increase Engagement:

Emmy-award winning made-for-education series like “Science of NFL Football” and “Chemistry Now” highlight the scientific and mathematical principles that underlie everyday events, while our library’s archival interviews and current events coverage show the impact of major world events on ordinary people.

Explain Key Concepts:

Our original Social Studies and STEM videos function as mini-documentaries to explain key concepts. They can recap an important moment from history or provide context for a scientific phenomenon in 6 minutes or less.

Applied Learning:

Give students the opportunity to apply their knowledge using archived news stories as case studies. Our current events collection is also updated daily so that students can learn about new technology, medical studies, court cases, and other news that connects academic concepts to real life events.

Media Player

- Print: Includes metadata and transcript
- Save: Add to your playlist
- Notes: Write personal notes for later reference
- Clip Video: Clip the video to your liking
- Share: Embed into a Learning Management System or email, share, and link to social media
- Download: Save to our HTML 5-powered Offline App
- Standards: Check which standards align to the video

- Description: Brief description to give context on the story
- General Information: Including the resource source, creator, publish date, etc.
- Citation Generator: Bibliographic information
- Transcript of the video
- Keywords: View related keywords that are hyperlinked to facilitate cross-content searches
- Playlists: View your saved playlists

Ongoing Support & Customized Curriculum Alignments

NBC Learn's curriculum team will work as an ongoing partner with Maine's curriculum leaders, library media specialists, and teachers to ensure a smooth implementation of the resource for all users. This includes ongoing professional development, unlimited virtual trainings, and curriculum alignment services to tailor the resources to your district, school and classroom needs.
