

INTRODUCING MAINE CONSTRUCTION CAREER DAYS

Maine Construction Career Days (MCCD) will expose Maine high school students to possible career paths in both the construction and transportation industries through hands-on experiences, exhibits and educational resources. Construction companies, school districts, state agencies, labor unions, trade and professional organizations are collaborating to provide the students with an introduction to various aspects of construction.

The inaugural 2022 Construction Career Days event will be held **October 6, 2022 at Midcoast Excavation, 19 Whorff Junction Road, West Bath, Maine** and hope to see you there! Each year this event will grow and attract more schools and students to experience a hands-on construction opportunity.

This event will increase career awareness in the construction and transportation industries through hands-on experience with heavy equipment, welding, small tools, plumbing, electrical wiring, surveying, waste water management, bridge construction, land clearing, underground utilities, Engineering and other construction related jobs. Several secondary educational resources and career training pathways are also available for students to learn about. Professionals from a wide array of construction related fields will be available to speak with students and answer questions about their experiences in the construction industry and why they are so passionate about their career.

The day will be open to all high school students, via registration through a participating school. One of the goals of this event is to encourage attendance of women and minorities to a target attendance of 25%. If you are interested in participating, please contact us at MCCD@nawicmaine.org for more details.

We look forward to seeing everyone at this event in 2022!
