Empty Bowl

Giving back to the school community

Presented By: **Maliyah Summers**

Things that make this stand out

Create bowls > helping our community

Students completely make the ceramic bowls, leading up to empty bowl night. With all of the money that is made from selling the bowls and auctioning them, the money is distributed to families who face food insecurity in our school and community.

Why does it matter?

Students learn a new skill and collaboration while giving to a good cause! Local businesses get recognition during the empty bowl night, getting an opportunity to get products auctioned off.

Soup and bowls

Local business

Local restaurants are providing soup to anyone who wants some, and for who buys a bowl!
